

GF-6 WAS DEVELOPED THROUGH OUR JOINT EFFORT WITH API, OEMS AND ADDITIVE COMPANIES. TESTED AND OPTIMIZED FOR MODERN AND LEGACY ENGINES. THE RESULT? OUR MOST ADVANCED MOTOR OIL EVER.

With the new standard comes a couple of new designations and new looks. ILSAC GF-6A standard will recognize approved oils that meet the API SP standard and meet the fuel economy specifications. Certification for 0W-20, 5W-20, 5W-30 and 10W-30 oils will be indicated by the familiar traditional starburst. The 0W-16 can also meet ILSAC GF-6 and API SP but since it is new it will have the new certification mark for GF-6B. Heavier grades like 10W-40 and 20W-50 will be certified to the API SP standard only and not carry an ILSAC certification mark.
